LUBRICATION INFORMATION

R.R. BRINK ELECTROMECHANICAL LOCKS

Under regular use conditions, lubrication of locks is not required. Factory application of Sentry's Detention Lock Grease HPG-49 provides lifetime lubrication. In the event of long disuse, excessive handling during repair, or part replacement, a renewal application of this type of lubricant may be helpful.

Do **NOT** use WD-40. UNDER NO CIRCUMSTANCES SHOULD YOU USE MACHINE OIL ON **ANY** R.R. BRINK LOCK.

With regard to key cylinders, Dow-Corning's 'Z' Powder (graphite) may be used to ease key operation.
